

# Adjustable Table

Tenjam Accessory

#90901XX\_ \_: 40" Diameter table with manual height adjustment, 100 lbs

The table base and column are made with steel and these components have a durable powder coat finish in a Silver Frost Metallic color. The top is finished with high pressure laminate (HPL) and a 3mm edge band.

## Height Adjustments:

This table has a "spring clip" height adjustment mechanism. This is a manual adjustment and we intentionally designed this to require 3 people to make a height adjustment. Two people must lift up on the table top and one person under the table must depress the spring clip. This is perfect for spaces where you don't want people adjusting the height frequently.
