DURA**FLEX**

SEAMLESS SOFT SEATING

INTRODUCING
DURA**FLEX**

DuraFLEX is our unique approach to soft seating for high traffic environments where the ease of washing and disinfecting furniture surfaces is critical. Featuring a flexible and waterproof thermoplastic outer shell that is completely seamless on the top and sides.
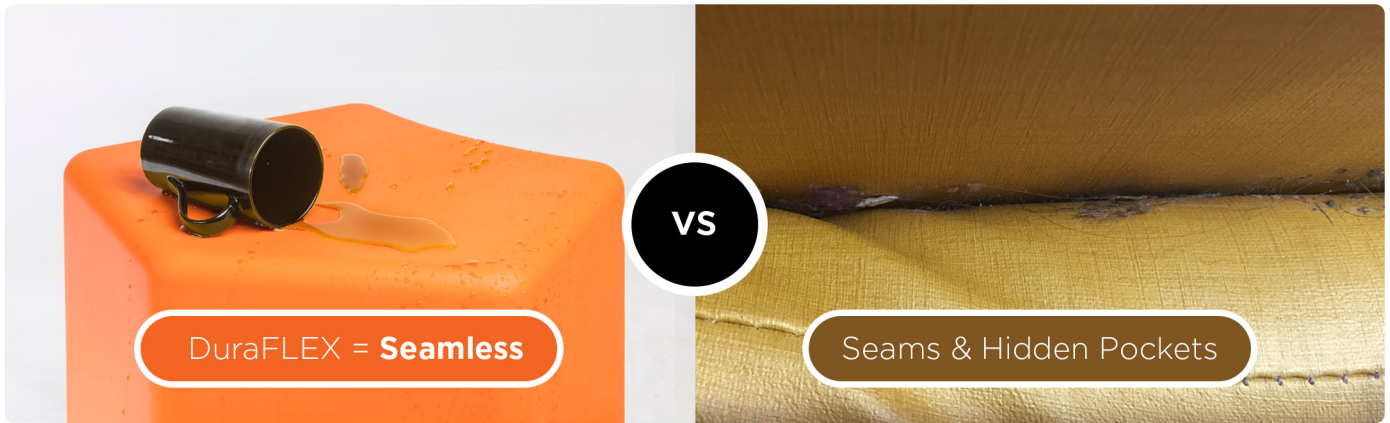

COMFORT & SUPPORT

DuraFLEX eliminates an internal rigid frame. The entire outer shell is flexible and its core is made of high density foam. Even the smallest DuraFLEX shape can support up to 500 lbs. This is a fun seating experience that is engineered for high traffic spaces. The seating is comfortable for guests of all sizes while maintaining great structural stability to ensure the user never feels a lack of support.

SECURE BASE

There is a solid base molded inside every unit and this allows the bottom to be finished with a thick plastic cover that is secured in place with screws. We do not use fabric or staples. Our method of finishing the bottom greatly reduces the likelihood of users dismantling the products without tools. Specialty tamper resistant screws can be added if your facility requires an additional level of security.

DuraFLEX = **Seamless**   VS   Seams & Hidden Pockets

EASY CARE

Clean and Disinfect the smooth surface with soap and water, then towel dry for immediate use. Use Formula 409®, Simple Green®, Clorox® Wipes, and a variety of healthcare grade disinfects including CaviWipes®, Virex®, Oxivir® and more. Remove gum and adhesives with Citrus Based Degreasers. Seamless & Waterproof flexible plastic shell protects the structural foam core from liquids and bodily fluids. The smooth surface and edges eliminates seams and hidden pockets where grime and bacteria collect.

TESTING MATTERS

171 lbs average **puncture resistance** tested in accordance with ASTM 4833.

Indoor Air Quality tested and certified as a **low emitting** product.

Passes **fire testing** in accordance with California Technical Bulletin 117-2013 (CAL117-2013) and clearly labeled for Fire Marshal inspection.

DURAFLEX **STANDARD COLORS**

Printed colors may not match finished product. For best results, request actual color samples.
