

WOOSAH

STACKING LOUNGE CHAIR

SESSION Series

Take a seat in the Woosah chair and let your shoulders and arms relax. Now take a deep breath and say “Wooooo-saaaaah” while slowly exhaling. Repeat until you feel the tension wash away.

The combination of the ergonomic contouring of the seat and the slight bounce designed into the frame make for a very comfortable chair. The seat is made with rotationally molded hard polyethylene material for supreme impact strength and low maintenance. The frame is made with heavy gauge stainless steel with an outdoor rated powder coat finish. Bring on the sun, sand, snow, salt, and rain...this chair can take it. Approximately 27 lbs.

- Stackable up to 4 units.
- Easy to clean and sanitize.
- Ultra-low VOC emissions to promote healthy indoor air quality.
- Fire test compliant with CAL117-2013 and has zero added flame retardant chemicals.
- Supports up to 500 lbs.
- Seat sheds liquids and dries fast.
- 100% recyclable.

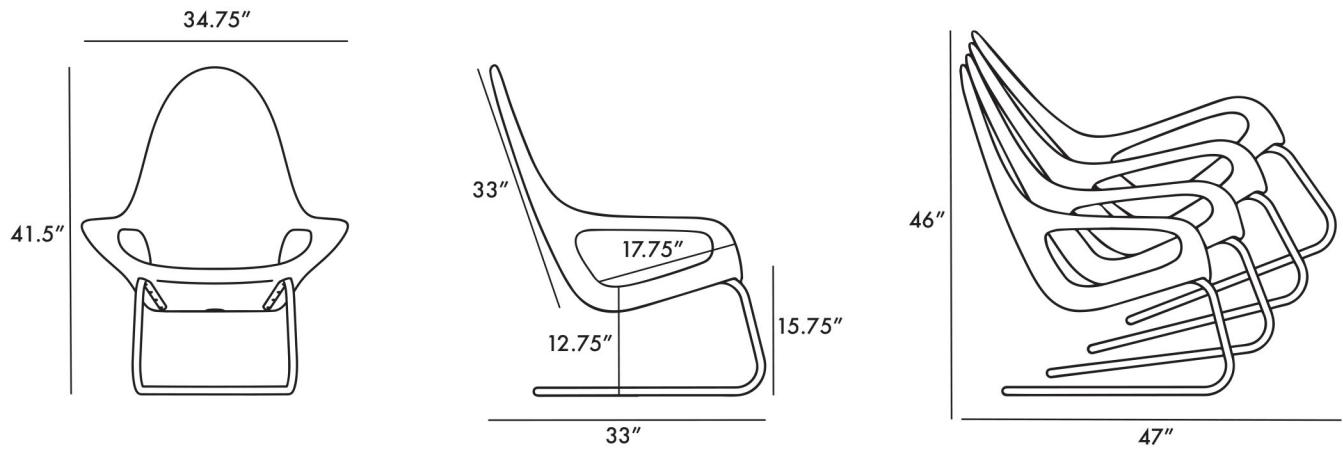

STACKS UP TO 4 UNITS

ABOUT WOOSAH

During development of the Woosah chair we took input from a hotel design team and here's what they wanted in an outdoor lounge chair:

- 1. Reduced parts:** This hotel group was using plastic adirondack chairs in their outdoor spaces that arrived as 30+ pieces of flat plastic parts that were assembled with 50+ screws. Assembly would take up to 30 minutes per chair and the screws on the chairs would loosen over time. This required constant maintenance and missing screws and loose parts led to guest safety concerns. In contrast, the Woosah chair consists of a one-piece polyethylene seat, one-piece stainless steel frame, and 8 stainless steel bolts. Woosah chairs assemble in a few minutes and this reduction in parts makes routine maintenance checks a breeze.
- 2. Stackable:** Woosah can stack 4 units high and is efficient to move around the property.
- 3. Increased Comfort:** Woosah has an ergonomically contoured seat that is much more comfortable than outdoor chairs made with flat plastic or flat wood pieces.
- 4. Higher Seat:** The hotels previous adirondack style chairs were just too low and the back of the seats were only 8" to 10" from the ground. Woosah is 15.75" height at the front of the seat and 12.75" at the back of the seat. This makes Woosah much easier to use and more comfortable for a wider range of guests.
- 5. Motion:** Woosah has a strong stainless steel base that allows for a slight bounce action.

STANDARD SEAT COLORS

2 digit color code corresponds to the blank spaces in the product SKUs above.

					
Lime Green LM	Yellow YE	Orange OR	Red RD	Violet VI	Sea Foam Green SF
