OPTIONAL ITEM	WEIGHTCAP	Tamper resistant screw cap provides a 1-3/4" diameter opening on the bottom of the furniture. Allows the core to be filled with pea-gravel for added weight. Gravel must be sourced and installed locally.	\$ 60	factory installed option		

Note about core filling Session Series products with pea-gravel (with #WEIGHTCAP option only):

- The #WEIGHTCAP option must be added on the order so we install the components into the bottom of the furniture during manufacturing.
- This is not an option that can be added/retrofitted in the field.
- Only Pea-size gravel can be used to fill the core of the Session Series products. Other weight filling material cannot be used as they will block tiny air holes added to the bottoms of the units that allow the internal air pressure to equalize with external air pressure.
- If you notice the unit appears to have surfaces that become concave or begin to bulge this is a sign that the air hole(s) have become blocked by the added gravel and you simply need to drill two additional 1/8" holes anywhere into the bottom of the furniture so the core can equalize properly.
- Pea-size gravel must be sourced and installed locally as Tenjam does not supply this material.

Splash Series

- These products are all suitable for use in and around a swimming pool in a range of shallow water depths.
- Some products have been modified for in-pool use to allow water to easily enter the product core and to drain when removed from the pool.
- Some products have been modified to add cupholders. Cupholders are standard on the products allowing for them. Select the SKU with the Cupholder color you desire (White = WH, Black = BL). Cupholders are removable for cleaning and they are not permanently bonded to the furniture.
