**Note about core filling Session Series products with pea-gravel (with #WEIGHTCAP option only):**

- The #WEIGHTCAP option must be added on the order so we install the components into the bottom of the furniture during manufacturing.
- This is not an option that can be added/retrofitted in the field.
- Only Pea-size gravel can be used to fill the core of the Session Series products. Other weight filling material cannot be used as they will block tiny air holes added to the bottoms of the units that allow the internal air pressure to equalize with external air pressure.
- If you notice the unit appears to have surfaces that become concave or begin to bulge this is a sign that the air hole(s) have become blocked by the added gravel and you simply need to drill two additional 1/8" holes anywhere into the bottom of the furniture so the core can equalize properly.
- Pea-size gravel must be sourced and installed locally as Tenjam does not supply this material.
