

FIBERGLASS AND VINYL LINER COMPATIBLE POOL FURNITURE

Tenjam furniture is designed with **rounded corners** and **standoffs** on the bottoms for fiberglass and vinyl liner pool compatibility. Sharp edges are non-existent on these products. Tenjam furniture is not dependent on drain plugs, and excessive water weight is not trapped in the product core. This allows the pool owner to easily add furniture to the pool, rearrange furniture for ideal sun exposure, and remove the furniture when it's time to cover the pool or use the furniture on the patio. The owner will not have to drag Tenjam furniture across their pool sun shelf and this reduces the potential for scratches and cuts to these pool materials. Some competitor products have sharp edges and corners and they are dependent on drain plugs that trap excessive water weight in the core. Dragging competitors heavy products across a fiberglass or vinyl pool bottom increases the potential for scratches and cuts.

2 TYPES OF BOTTOM CONTACT

Shayz Lounger
& Optional Risers

FURNITURE INSPECTION & MAINTENANCE

Dragging furniture on hard patio surfaces can cause the bottom to become rough. Scan this QR code to watch a video demonstration showing how to inspect and maintain the furniture so it remains compatible with a fiberglass or vinyl lined pool.
