Session Series Product Options:

Weightcap: this is a threaded screw plug welded into the bottom of some Session Series hard plastic products. Allowing the customer to add pea-gravel into the hollow core of the product. This is not an option that can be installed in the field and must be selected at the time of ordering. The pea-gravel must be sourced and installed locally. Choose gravel that is small (1/4" to 3/4" diameter stones) that are washed and have reduced dust. The products have air holes added to the bottoms so the internal air pressure can self regulate with the external air pressure. Using dusty gravel to fill the product core is likely to block the movement of air in and out of the product core.

Soft Touch seat toppers are always 2-tone gray color. The material is marine grade EVA foam with adhesive formulated for polyethylene material. Polyethylene gets very hot when used outdoors in direct sunlight locations. Soft Touch provides excellent heat dissipation in outdoor environments and lowers the surface temperature of the seating surface. Soft Touch also adds slip resistance to the top surface so water bottles and other items don't slide off the top surfaces. Soft Touch adds a slight amount of cushioning for indoor and outdoor use.

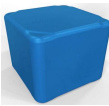

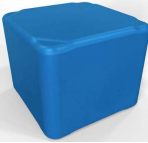

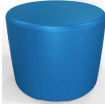

Session Series

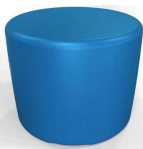

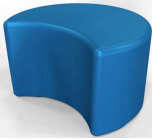

All Session Series products are suitable for indoor and outdoor use. Hard plastic material (polyethylene). 100% Recyclable.
