DASH SESSION

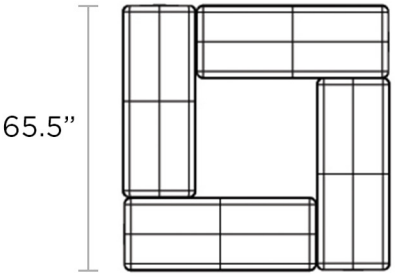

#11601BX _ _ - Dash Bench Session, Color TBD

Dash is a rectangular-shaped bench, designed for modular configurations which can be adapted to shape spaces and evolve with the moment. From linear seating to dynamic arrangements, Dash benches are versatile building blocks and can also be seamlessly paired with our Swerve collection (arc-shaped bench) for even more possibilities. For permanent installations, the benches can be connected together and anchored to the ground using the stainless steel ganging bracket kit (90501XXSS).

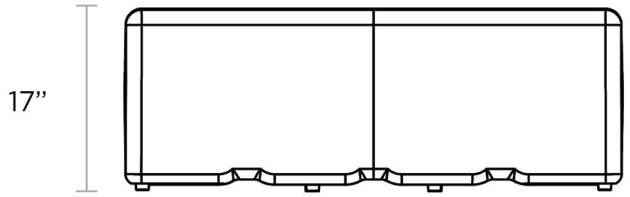

- Designed for use both indoors or outdoors, in demanding environments such as school campuses, healthcare facilities, and busy commercial & hospitality spaces.
- Extremely durable, impact resistant and strong, with a 500-pound weight capacity.
- All-weather design is rustproof, waterproof, UV-stable and fade-resistant for lasting performance season after season.
- Crafted with a one-piece construction and rounded edges for safety.
- Easy to clean with soap and water or a bleach solution, with no stitched seams or crevices where bacteria can harbor.
- Santoprene rubber legs for floor protection and anti-slip resistance.
- Available with a WeightCap ballast option, which is a threaded screw plug on the bottom of the furniture allowing up to 100-pounds of pea gravel to be added to the core for additional security.
- Available with a Soft Touch top option, which is a marine-grade EVA foam pad topper to provide additional cushion and insulation from hot surfaces when used outdoors.
- Made in the USA with premium materials and craftsmanship.

WEIGHTED SEATING

Our Weightcap option is designed to provide extra weight ballast for select furniture collections, to provide enhanced wind-resistance, theft-deterrence, and to keep furniture pieces securely in place. This is particularly helpful in areas that are wind-prone such as rooftop installations, public spaces where an added level of security is needed, or in modular layout configurations to keep the furniture components correctly positioned.

The Weightcap is a threaded screw cap welded into the bottom of the furniture, allowing customers to fill the internal core with pea gravel for customized ballast. Dash can accommodate up to 100 lbs. of added pea gravel weight.

The Weightcap is an option that must be specified at the time of ordering. The pea-gravel is not included, must be sourced and installed locally. For best results, use washed pea gravel with reduced dust and smaller stone sizes (1/4" to ¾" diameter stones).

#11601BWC _ _ - Dash Bench Session w/ Weightcap, Color TBD

SOFT TOUCH FOAM TOP

Soft Touch Foam Top is an optional upgrade designed to enhance the performance, comfort, and style of select furniture collections.

Crafted from premium marine-grade EVA foam, Soft Touch provides a durable, waterproof, and easy-to-maintain surface built for demanding outdoor or indoor environments. The Soft Touch material stays cooler than standard polyethylene surfaces and provides an insulating layer for seating areas—especially beneficial for furniture installed in direct sunlight and spaces without overhead shade structures. Soft Touch Foam Top also provides an added measure of slip-resistance and cushioning. This option must be selected at the time of ordering for factory installation and cannot be field installed.

Available in Light Gray (LG) and Tan (TA), Soft Touch Foam Top pairs seamlessly with Tenjam's fifteen standard base colors.

#11601BST _ _ _ _ - Dash Bench Session w/ Soft Touch Top, Colors TBD

- First two blanks indicate the desired Soft Touch Foam Color.
- Last two blanks correspond to the color code for one of the 15 standard base colors.

DASH & SWERVE GANGING INSTRUCTIONS

Ganging Bracket Kit for Dash & Swerve (Session Series Only)

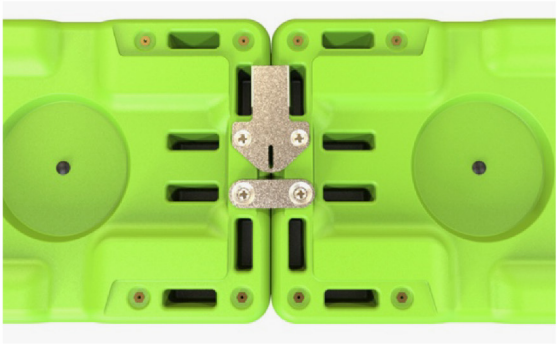

Both Swerve & Dash have the ability to be connected to one another in several different configurations, or to be anchored to the floor. This is done with optional ganging brackets made of stainless steel.

#90501XXSS: Ganging Bracket Kit for Dash & Swerve - Includes 2 Deluxe Brackets, 2 Straight Brackets, and 8 mounting screws.

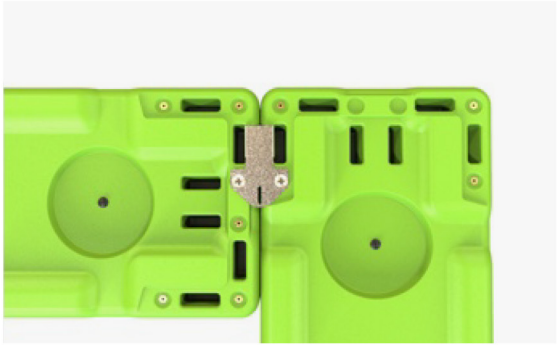

INLINE CONNECTIONS

Connect inline combinations of Dash & Swerve modular benches together using one Deluxe Bracket and one Straight Bracket.

90 Degree Turn

A single Deluxe Bracket can be used to connect two Dash units at a 90 degree angle, as shown.

SECURING TO THE GROUND

The Deluxe Brackets can be turned so the head faces outward and reveals the anchoring slot in the bracket. Add your own achoring fasteners for your type of flooring. Remove rubber legs from benches so the exposed bracket is flush with the ground.
