

Shaka Tables Collection

Break time, study time, team time, any time, every student has a seat at the table—and a space to shine. All-weather, all spaces, and always ready.

Shaka Tables

- Sizes: 38" square, 72" and 94" rectangle
- Designed for performance, durability, and easy/low maintenance
- Premium aluminum frames for all-weather performance and corrosion resistance
- Maintenance-free High-Density Polyethylene (HDPE) table & bench tops
- Corners are radiused to prevent sharp edges
- Table tops feature umbrella holes
- Leg leveling glides for stability on uneven surfaces
- Ground anchoring plates for security
- 72" and 94" models are ADA-compliant on the end positions

Shaka Table Sizes

38" Square Top

Overall Dimensions:
Height: 30" Width: 76" Depth: 76"

29" x 72" Rectangular Top

Overall Dimensions:
Height: 30" Width: 72" Depth: 67.5"

29" x 94" Rectangular Top

Overall Dimensions:
Height: 30" Width: 94" Depth: 67.5"

Shaka Table and Bench Top Options

High-density Polyethylene (HDPE)

Stocked/Standard Colors

Weathered Wood

Light Gray

- Won't splinter, crack, chip, peel, stain, or rot and impervious to insects
- No painting, staining, or waterproofing required
- Rich colors stay brilliant thanks to built-in UV protection
- Recycled Content Certification by GreenCircle, and first in the industry to receive a Closed-Loop Product Certification

Shaka Table and Bench Top Sustainability

High-density Polyethylene (HDPE)

- Our HDPE table and bench-top materials are made from post consumer and post industrial recycled content
- The HDPE materials have achieved Recycled Content Certification by GreenCircle. This certification qualifies and substantiates our compliance with all Federal Trade Commission (FTC) Green Guidelines
- The HDPE materials also meet criteria for USGBC LEED requirements
- Our HDPE material is the *first* in the industry to receive a Closed-Loop Product Certification. Plastic scrap generated during the fabrication processes is returned to mill for reuse and recycling. GreenCircle has audited and certified this take-back program and awarded the Closed-Loop Product Certification.

Reduce Waste & Landfill Pile-Up

We give consumer plastics new life and constantly reuse scrap material to manufacture more product, reducing waste dramatically.

Reduce Deforestation

Unlike traditional wood, alternative lumber eliminates the need for deforestation – saving countless trees that wildlife depend on for food and shelter.

Reduce Air & Water Pollutants

Unlike wood, our structural plastic lumber doesn't need to be chemically treated so there's no leaching of chemicals into the ground or water.

Reduce Toxic Exposures

Recycled HDPE plastic lumber doesn't emit toxins and irritants into the air or water like PVC or treated wood.

Shaka Frame Sustainability

Powder Coated Aluminum

- Aluminum is infinitely recyclable: unlike most materials that degrade during the recycling process, aluminum retains all of its original properties no matter how many times it is recycled. 75% of all aluminum ever produced is still in use today!
- The powder-coat paint used on Shaka tables is phosphate-free. Unlike traditional paints and coatings, our phosphate-free coatings do not produce hazardous waste materials, which minimizes the environmental impact and simplifies waste disposal and handling.
